

**Revanth S**

**Co-Founder, Stacia Tech | CTO**

**Tech Visionary | Solution Architect | DevOps Specialist**

---

## **About**

I'm a DevOps Specialist with 5 years of expertise in deployment, holding a Mechanical Engineering undergraduate degree. My passion for technology and science led me to explore innovative solutions, building a hybrid vehicle that secured 8th position in the All-India Hybrid Vehicle Competition organized by Formula Imperial under ISIE. This achievement fueled my interest in technology, inspiring me to transition into IT with a focus on deployment and cloud solutions.

Armed with an AWS Solution Architect certification, I specialize in leveraging cloud services to build scalable, highly available infrastructures. My expertise lies in automating infrastructure, streamlining deployment processes, and developing efficient mobile and web applications. My journey from mechanical engineering to DevOps showcases my dedication to harnessing technology to solve complex problems with precision and creativity. I'm continuously evolving, staying updated with the latest technologies to deliver cutting-edge solutions that bridge the gap between innovation and implementation.

---

## **Background**

Revanth holds a **Mechanical Engineering** degree from the **Panimalar Insitute of Technology (PIT)**. He further specialized with a **AWS Solution Architect certification** from **Amazon Web Services, Seattle, Washington, United States**

His interdisciplinary expertise enables him to bridge the gap between hardware and software, strategy and execution, vision and results. With a unique ability to convert abstract ideas into tangible innovation, Revanth continues to shape a future where technology meets humanity with intent.
